Profile

Project-oriented Computer Engineer with expertise in programming, web and app development, databases and agile methodologies.

Work Experience

Software Engineer | SQL Server, Java
Ford México

📅 05/2024 – 09/2024

Collaborated on a custom in-house web application interpreter, acquiring proficiency in a proprietary language to effectively interact with databases.
Executed database queries to dynamically update HTML content, ensuring seamless integration and real-time updates directly from the database.

Front-end Web Developer | React
Viakable

📅 02/2024 – 09/2024   📍 COLLAB. PROJECT | WORK ON DEMAND

Developing an admin web application to manage and display user data collected from a mobile app. Utilizing Git for version control.
Collaborating closely with team members to align the web app's functionality with the mobile app's data collection process.

Customer Service and Administration

📅 01/2023 – 12/2023

Managed electronic billing procedures and maintained accurate records of accounts receivable and financial transactions.
Developed and maintained price lists using Excel, ensuring accuracy and efficiency in pricing strategies.

Academic Projects

Front-end Web Developer | Angular JS
Pred-Acad

📅 02/2021 – 06/2021

Developed and programmed a web system that predicts the probability that a student will pass a subject using data mining techniques.
Collaborated with back-end developers to integrate **APIs** and data sources, ensuring accurate and up-to-date information for users of Pred-Acad.

Software Developer| C#, PostgreSQL
Delivery App

📅 03/2021 – 06/2021

Developed **front-end user interface** for the Delivery App project using C# to enhance user experience and increase overall usability.
Implemented backend functionality, including **database design and managemen**t using PostgreSQL, to ensure seamless data flow and efficient storage of user information.

Application Developer
Concert Tickets | Flutter

📅 08/2021 – 12/2021

Developed a user-friendly **mobile application** using Flutter framework to allow users to easily browse, purchase, and manage concert tickets.
Collaborated with cross-functional teams to integrate API endpoints for real-time ticket availability and pricing updates.

Education

Copmputer Engineer | Bachelor Degree
Universidad Autónoma de San Luis Potosí

📅 2016 – 2023

Other Skills

ⓘ **LANGUAGES**

English TOEFL B2 High
Intermediate (2023)   Spanish
Professional   **Native**

ⓘ **HARD SKILLS**

Javascript & Typescript   Python   PHP   Figma

Illustrator   Photoshop

Courses

📅 10/2023
React Professional Course

📅 11/2023
React Native Course

Certificates

📅 06/2020
CCNA Routing and Switching: Introduction to Networks
CISCO Networking Academy
